## **Nan Gall's INTELLIGENT TRIGGER has now done OVER 100 Live Runs**

The unique Intelligent Trigger from Nan Gall Technology has now performed over 100 live runs – most of them in the demanding conditions of the North Sea.

The Intelligent Trigger has been certified for use by an independent certifying authority and has passed the very stringent risk assessment criteria laid down by North Sea operators.

The unique combination of features has allowed the following operations to be performed:

- PLT deployment
- Perforating runs
- Plug setting
- Packer setting
- Casing cutting
- Sampler activation
- Tubing punching
- Dump Bailing

Our customers include:

- Aker Maritime
- Baker Oil Tools
- Expro
- Read WS
- Weatherford

For more information on the safest way to activate almost anything from slickline or coiled tubing, please visit [www.nangall.com](http://www.nangall.com) or contact:
